# ally Colour Contrast Audit

## Color Contrast Accessibility Validator

WCAG 2.1 AA SC 1.4.3 Test for Color Contrast

<https://rachelwong.github.io/po>

[Check Contrast](#)

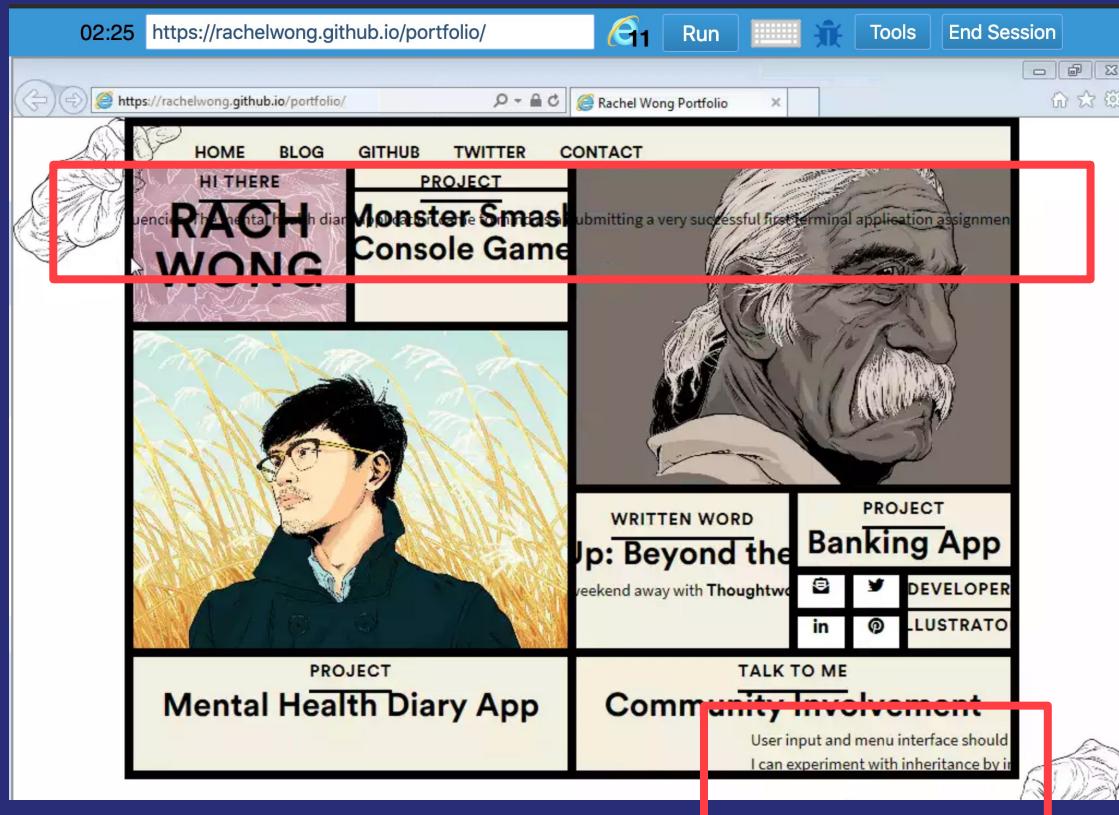

Automatic programs such as this cannot analyze text embedded in images and may misdiagnose or ignore certain critical issues. We recommend that you combine contrast testing results from this website with a manual test performed by a [trained accessibility expert](#).

**Page Analyzed:** <https://rachelwong.github.io/portfolio/>

[Free analysis of your website using WCAG 2.1 A/AA guidelines](#)

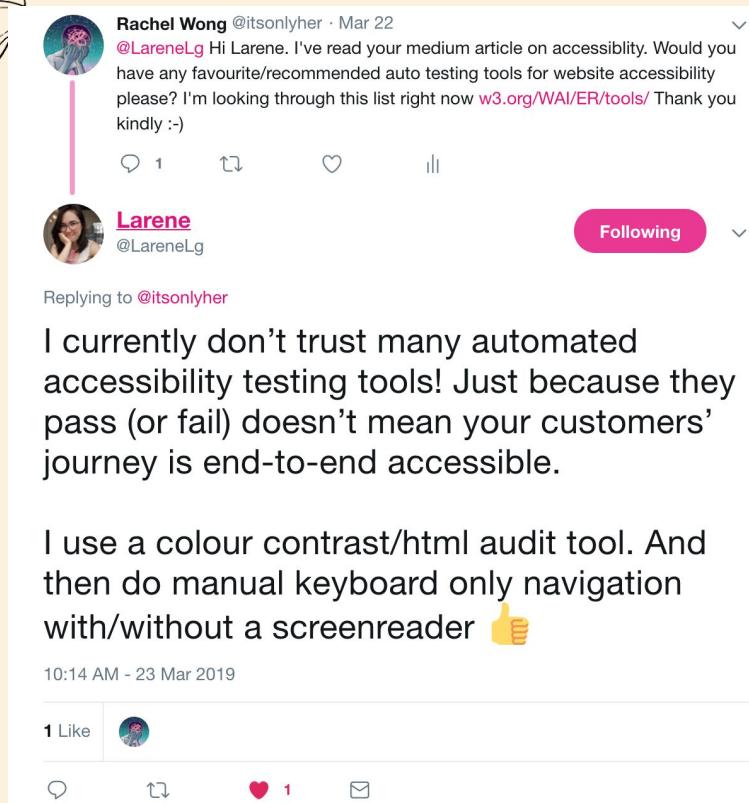

Item	Background Color	Text Color	Font	Content	Failure Reason	
1			<b>Family:</b> "Source Sans Pro", sans-serif <b>Size:</b> 15px (11.25pt) <b>Style:</b> normal <b>Weight:</b> 400 <b>Line-Height:</b> 30px (22.5pt)	MONSTER SMASH CONSOLE GAME <a href="#">Code Snippet 1</a>	<b>Required ratio:</b> 4.5:1 <b>Current ratio:</b> 1:1	Increase contrast by at least 350% to pass.

# Browser Compatibility

# Accessibility Testing

Rachel Wong @itsonlyher · Mar 22  
@LareneLg Hi Larene. I've read your medium article on accessibility. Would you have any favourite/recommended auto testing tools for website accessibility please? I'm looking through this list right now [w3.org/WAI/ER/tools/](http://w3.org/WAI/ER/tools/) Thank you kindly :-)

1 1 1 Following

Replying to @itsonlyher

I currently don't trust many automated accessibility testing tools! Just because they pass (or fail) doesn't mean your customers' journey is end-to-end accessible.

I use a colour contrast/html audit tool. And then do manual keyboard only navigation with/without a screenreader
